Construction and ergodicity of hypoelliptic diffusion for large interacting systems

Boguslaw Zegarlinski
Imperial College

Resumo:

I will present recent results concerning a construction, smoothing properties and ergodicity for a class of Markov semigroups on finite and infinite spaces with formally hypoelliptic generators.

Data: Terça-feira, 21 de março de 2017, 14hs.

Local: Sala 321 do IMECC.
